

POP® PRG 510 & PRG 511

This simple, effective pneumatic tool is strong, compact and trouble-free for continuous high-production riveting.

It is available with deflector (PRG version) or with Mandrel Collection System (MCS version). The PRG 511 offers an extended nose housing for improved access.

Specifications

Overall length with MCS Overall length with MCS collector bottle:	PRG 511 - 311mm (12.2")
Weight:	1.8kg (4lbs)
Working air pressure:	5.8bar or kgf/cm2 (85psi)
Air consumption:	1.19 litre free air/set rivet (0.007 cf/rivet)
MCS air consumption:	53.8 litre free air/minute

POP Rivet Tools - PRG 540 - MCS 540

The heavy-duty, pneumatic-hydraulic PRG 540 is extremely strong, robust and reliable. As such it is unbeatable for efficient riveting on mass-production lines.

Setting all 'POP®' blind rivets up to and including 6.4mm diameter, the tool is available with either a standard mandrel deflector or with a Mandrel Collection System.

Specifications								
Working air pressure:			5.6 bar or kgf/cm ² (85 psi)					
Air consumption:			1.54 litre free air/set rivet (0.022 cf/rivet)					
MCS air consumption:			53.8 litre free air/minute					
Overall length with standard deflector:			230mm (9.05")					
Overall length with MCS collector bottle:			343mm (13.5")					
Weight:			2.2kg (4.85 lbs)
