# Alcoa Fastening Systems & Rings

## Tool & Product Update

# 244BT NOW SOLD WITH GREATER VARIETY OF REGULATORS

As new uses are developed for the 244BT Pneudraulic Installation Tool, models will now be sold with the specific pressure regulator required for the fastener to be installed.

Please see the table below outlining the tool-regulator, fastener, and nose assembly combinations necessary for application.

Regulators are also available separately; however, they must only be used as described in the table below. Using a pressure regulator not intended for a specific fastener can result in damage of equipment and fasteners and improper and unsafe installation of fasteners.

*Please note:*
*The base model 244BT comes with the 85psi regulator only.*

| Fastener Size and Collar Material | Tool (244BT-##), Regulator (127308-##), and Nose Assembly (99-79##) combination | | | |
|---|---|---|---|---|
| | **244BT-43** includes 127308-7 43 psi Regulator | **244BT-68** includes 127308-11 68 psi Regulator | **244BT** includes 127308-17 85 psi Regulator | **244BT-97** includes 127308-15 97 psi Regulator |
| **-06 BT (3/16")** Grade 2 | **99-7931** | - | - | - |
| **-08 BT (1/4")** 6061 Aluminum | **99-7932** | - | - | - |
| **-08 BT (1/4")** Grade 2 | - | - | - | **99-7932** |
| **-08 BT (1/4")** 430SS | - | - | **99-7932** | - |
| **-10 BT (5/16")** 6061 Aluminum | - | **99-7933** | - | - |

We look forward to serving all your tooling needs. For more information or to order, please contact your local distributor, call direct, or visit us on the web:
