Item # RNHT-3118, Rivet Nut Hand Tool

Rivet Nut Hand Tool (RNHT)

The RNHT can install all styles of rivet nuts from 6-32 to 3/8-16 and M3 to M10. Tools may be purchased individually, or in a wide variety of convenient kits and bags. Each tool has the same body size, requiring only one 11/16 inch ratchet and one 7/8 inch wrench to install all sizes and styles of rivet nuts. In addition, this line of hand installation tools uses a standard socket head cap screw as a mandrel, making replacement convenient and economical.
